FROM A SCIENTIFIC POINT OF VIEW, I'M QUITE INTERESTED!

YOU'RE VAGUE ON ONE POINT, CARNAGE! WHAT'S THE MOTIVE BEHIND ALL THIS? HATE? REVENGE? LOVE?

A COMBINATION OF ALL THREE! HATE AND REVENGE FOR THE MAN WHO MADE MY FACE THE HIDEOUS MASK IT IS! AND LOVE FOR THAT MAN'S DAUGHTER, MISS GRAYSON!

LET ME TELL YOU A STORY! MANY YEARS AGO, DICK GRAYSON AND I WERE WORKING TOGETHER ON AN EXPERIMENTAL PLANE WHICH WAS TO REVOLUTIONIZE THE AIRCRAFT INDUSTRY! WE WERE TEST-FLIGHTING THE SHIP...

I'VE GOT TO LAND HER... I'VE GOT TO! GRAYSON, DO YOU HEAR ME? YOU'LL PAY FOR THIS, WHETHER I LIVE OR DIE! YOU'LL PAY!

Somehow... I don't know how... I landed my own pyre...

I'LL COME BACK, GRAYSON! I'LL COME BACK... OHHH... MY EYES!

THAT'S WHY I HATE.... NOT ONE MAN, BUT ALL MEN... THE WHOLE WORLD! IT'S A QUIRK OF FATE THAT I LOVE THE DAUGHTER OF THE MAN I HATE MOST!

OH, NO! I CAN'T BELIEVE IT... I JUST CAN'T!

BEFORE WE DISCUSS FUTURE STRATEGY, I'D LIKE YOU TO SEE MY LABORATORIES. IN SOME RESPECTS, WE'RE FIVE YEARS AHEAD OF THE REST OF WORLD SCIENCE, YOU KNOW!

YOUR FLOATING EMPIRE INTRIGUES ME, CARNAGE!

WE'VE DEVELOPED VARIOUS RAYS THAT LEAD THE FIELD IN ELECTRONICS... RAYS THAT CAN PULVERIZE A CRUISER AT TWENTY-FIVE MILES... RAYS THAT CAN PENETRATE WALLS OF LEAD AND FUSE ALL MATTER INTO DUST!

I BELIEVE YOU! I SAW A SAMPLE IN MY OWN PLANE! VERY INTERESTING!

BLACKHAWK, I OFFER YOU HALF A WORLD! I GIVE YOU LEADERSHIP OF THE GREATEST ARMADA OF SUPER-BOMBERS MAN HAS EVER SEEN... A ROBOT FLEET WHICH WILL CRUSH TO A PULP ANY RESISTANCE OFFERED!

IT'S A BIG OFFER! I'LL HAVE TO THINK IT OVER!

VERY DRAMATIC, MY DEAR PAM! I'M SURE BLACK-HAWK CAN MAKE UP HIS OWN MIND, WITHOUT BEING PREJUDICED BY YOUR HYSTERICS!

COMMUNICATIONS CALLING, SIR! SQUADRON OF FIVE FIGHTERS INTERCEPTED ON OUR RADAR SCREEN... HEADED THIS WAY! ANY ORDERS?

MON AMI, YOU ARE TIRED! SURELY YOU CANNOT MEAN ZAT WE, ZE CHAMPIONS OF FREEDOM AND JUSTICE, ARE TO JOIN FORCES WITH A MURDERING MADMAN SUCH AS THEES CARNAGE? SAY NO, MON AMI!

YES! THAT'S WHAT I ASK! TAKE IT OR LEAVE IT!

True to his word ....

THEY'RE A HAPPY BUNCH, NOW! TOO BAD WE CAN'T BRING THE CREWS OF THOSE SHIPS BACK WITH US! MAY THEY REST IN PEACE!

WE'VE ROUNDED UP THE REST OF CARNAGE'S GANG, BUT WE CAN'T FIND CARNAGE!

MAIS NON! NOT ALONE!

ZAT CARNAGE IS WILY AS LE DIABLE HEEM-SELF!

WHERE ARE YOU, BLACKHAWK? I KNOW YOU'RE NEAR ME... BUT WHERE? LEAVE QUICKLY... I'VE WIRED THE CONTROLS TO BLOW UP SIMULTANEOUSLY!

I THOUGHT I COULD SAVE YOU, CARNAGE... BUT YOU WOULD ONLY HAVE MET DEATH IN ANOTHER WAY!

I LIVED VIOLENTLY, AND SO I PREFER TO DIE! FLAMES LED MY FOOTSTEPS TO THIS LIFE... AND NOW BY FLAMES, I DIE! GO!

SO BE IT, CARNAGE! WHO KNOWS BUT THIS WAY IS BETTER? GOODBYE!

I CAN'T FEEL SORRY FOR CARNAGE! HE TRIED TO RIGHT A WRONG BY COMMITTING GREATER WRONGS! IN HIS WARPED, TWISTED BRAIN, HE FORSOOK LAW AND JUSTICE FOR VIOLENCE AND GREED!

**M**UROC Dry Lake, that famous testing ground for California airplanes, shimmered under a blazing sun. Lava. Solid lava for many miles, acted like an iron reflector for the sun's rays.

Test Pilot Ted Kane blinked his eyes and wished the test was over. But it hadn't started as yet. The big shots from L. A. hadn't showed up. No, it would have to come off during the heat of the day. Ted liked to get his testing over in the early mornings; then it was cool, and the sun's glare wasn't so intense.

The chief engineer of Airways stood beside the small, fleet ship that Ted would soon take up. It was his baby, this sleek little monster with its two thousand horses hidden under fancy cowling. He planned great things for it.

Radical in design, yes; and maybe it did flaunt some of the conventions in engineering; but he knew it was good.

"Give her the works, Ted," he said to Kane. "I think she's got it."

Ted grinned wryly. "I'll soon know, Jack. "But I wish I could have put her through her paces before the sun got so hot."

"I know." Jack glanced around. "No sign of 'em yet. What do the biggies care what we go through? They want a plane, a good plane. So we sweat over a design."

"And then I go up," filled in Ted, "to see if she'll stay up or pile up!"

Two limousine loads of famous names in airplanes drew up to the little operations office. The portly figures crawled out, shaking desert dust from their immaculate clothes.

"Well, boys," said President Hurst, "Is everything all set?"

Jack said, "All set, sir. Ted's going up right now."

The engine was idling on the untested ship. Ted Kane strapped on his double chutes and fitted himself into the narrow cockpit. He gunned the motor and then began taxiing down the smooth lava floor of the extinct lake. He

lifted both hands in the well-known grip as he pulled the little shiny plane into the air.

Up—up went the screaming ship, spiraling into the coppery skies. At last it was but a speck far overhead.

Such tests were routine. There were many things a new plane had to be tested for: weight and balance, response to throttle, stall and side-slip and pull-out and diving ability.

Ted at last got her into a straight-down dive and poured it on. The plane bored downward at full throttle, and when it seemed that she was about to stick her nose into the hard lava, he pulled her out in a howling curve upward.

"Hope he didn't blackout," said the engineer. "Guess he didn't; there he goes for another try."

Ted next took her up to about 10,000 and began a series of rolls and dips, Immelmans and barrel-rolls. The usual stuff.

He was roaring over the field now in a great burst of speed, while the electronic clocker measured the pace.

It was then that something happened. The motor of the new plane quit. Flame streaked from the sides. The plane nosed over. They saw Ted bail out, fall several hundred feet, then his chute ballooned.

The plane itself turned over and over, then crashed straight down, exploding when it struck the lava.

"Dunno what happened," reported Ted when he got back to the test field. "The engine suddenly quit. Seized. Froze. I dunno."

A squad of men was working over the smoking wreck of the plane. They soon had a report on what had stalled the engine: bearings tightened on the crankshaft.

This was something for the engineers to figure out. They couldn't because the examiners had found no trouble with the oil leads to the bearings.

Jack, designer of the new ship, was in a

terrible dither. He swore the design was right, that no fundamental error had gone into the engine or the plane itself. Then what was wrong?

During ensuing weeks, a half dozen other new plane models were tested at Muroc; the same thing happened to them all. Frozen bearings. Crashes. In one instance, the test pilot was unable to extricate himself from the falling ship and went to his death.

Blackhawk and his famous crew soared over Muroc in a large plane. The government had at last called them in on the case. Officials were baffled. Tests had to be made at Muroc, it being one of the few places in the state where air conditions were ideal for all tests.

"There is to be a test tomorrow of that new PB-3 for Maco," said Chuck, one of Blackhawk's men. "It's a big one."

Stanislaus grunted. "There's something in the air that kills the engines."

Blackhawk nodded. "That's what I've been thinking. Yet none of the instruments show anything."

"The tests are to be tomorrow," Andre reminded them. "Maybe today the air is clear."

It was at one o'clock the following day that Blackhawk spotted the aircraft flying high above their own plane. The Muroc tests were to come off in an hour. What was that plane doing far overhead? He tried to contact it with radio, but failed.

Chuck said, "They won't answer. It looks funny to me."

"Yes," said Blackhawk, "let's go up."

But the farther they spiraled upward, the higher the mysterious plane sped.

Olaf said in his deep Scandinavian, "It iss a rocket ship, ja. We cannot catch it."

Blackhawk said, "But there is a way to halt it, Olaf . . . man the gun. Load with the aluminum powder shells . . . get the range."

"It's 2400 yards, Blackhawk," said Chuck, tinkering with the radio apparatus.

"Aim one hundred yards in front of them and cut loose!" ordered Blackhawk.

The gun began coughing shells upward. Blackhawk watched through his powerful glass.

"There," he reported. "The first shells have exploded. They're entering the aluminum screen. Ah—just as I thought. Pre-ignition is giving 'em trouble!"

Andre was looking, too. "They are bailing out!" he cried.

It was true. The big rocket ship above them had become unmanageable, and now its crew was bailing out, while the ship itself was falling out of control.

"Let's give 'em room," said Blackhawk as he maneuvered his plane out of the way.

Olaf said, "Ach, now I understand. I haaf been taking samples of the air . . . we'll have a nice report to make to those government men—why their motors seized."

Blackhawk nodded. "I'll radio the field and tell them to grab those men as they hit."

As Blackhawk's plane cruised in a circle, the strange rocket ship crashed in a burst of flame far below. Its crew was long ago in custody.

Then abruptly, the engines of Blackhawk's ship began to cough and sputter. One of them suddenly shook violently and flew out of its nacelle.

"Cut the other engine!" he ordered. "Migosh, I forgot all about our own ship. Its engines are just as susceptible to their devilry as any others."

Blackhawk and his men came down and in for a landing in a smooth glide, both motors still; of course, one engine lay on the field, a blackened, shattered hunk of iron.

In a moment experts were all over the ship. Their report was the same as previously: seized bearings.

"Look at the sediment under a microscope," Blackhawk said. "I think you'll find your answer. You see, these fellows—I think you'll find they are working for a belligerent government—were using a full rocket ship, which was more or less immune to fine steel powder, which they were throwing into the atmosphere. That's what ground out your bearings—ours, too."

"Then how did you stop their ship?" asked one of the experts.

"Aluminum powder," replied Blackhawk. "Pre-ignition fouled their engine. It's the only way to stop a rocket."

- ★ Spectacular new Electronic Propulsion locomotives
- ★ Billboard whistle—works with any train system

The new American Flyers bring you all the wonder and glory of railroad-ing. They puff real smoke. The built-in "choo-choo" reproduces the choo-choo sounds of a real locomotive under full steam. Both smoke and "choo-choos" vary in intensity as you increase or decrease the speed of your train. Locomotives, tenders, cars and track are all built to uni-

form 3-16" scale, so that your train looks like real—hugs the track like real. Cars have automatic couplers that couple anywhere. Uncouple by remote control. Die-cast locomotives have superpower worm drive that assures smooth, steady pull at all speeds from a crawl to 120 scale miles per hour. See and hear the sensational American Flyers at your nearest department or toy store.

See . . . American Flyer's 2-rail track has no old-fashioned third rail in the middle. "T" design rail. Looks just like the track of a real steam railroad.
